

LET'S TALK SOIL CARBON

JOIN US FOR AN INTERACTIVE SESSION

with Dr Terry McCosker and Anne Coote

Chat with guest speakers, ask questions and listen to a wide range of topics, including:

- What is soil carbon
- Why is soil carbon so important?
- What practice change can we implement to build soil carbon?
- How is soil carbon measured
- How does a soil carbon project work?

About the Guest Speakers

Terry is the Director of RCS Australia. He is an internationally acclaimed teacher and has worked in research, extension and property management across government and private sectors for more than 50 years. Anne is the Team Leader of Productive Agriculture Climate Friendly. An agricultural professional, she says she is most comfortable when her feet are on the land, and talking to fellow farmers - discussing shared experiences, challenges and solutions.
