

# A Pattern

## For Powerful Tech Training

1

### Present Your Child With Great Info

Pick an important topic, and then find something for them to consume. (An article, a video, a news report, conference talk, etc).

2

### Ask Your Child's Opinions on the Info

What do they think about the topic? Ask them about it, with a genuine desire to hear their perspective. Listen like a champ.

### Try it with these!
