

IS YOUR COMPANY'S NETWORK RUNNING SLOW AND CAUSING PROBLEMS?

If so, we would love to offer you a free Network Assessment to help pinpoint vulnerabilities and improve overall performance.

WHAT TO EXPECT FROM YOUR NETWORK ASSESSMENT

Our FREE Network Assessment examines the health of your IT infrastructure, diagnosis weaknesses and vulnerabilities, and provides cost-effective solutions to keep your IT systems in tip-top shape.

-  Diagnose network problems such as slowness or downtime
-  Verify your backups are working properly and are recoverable in the event of a hard drive failure, flood, lighting strike, or employee sabotage
-  Review your server logs to uncover developing problems that could turn into big and costly issues down the road
-  Answer any questions you may have about your network including hardware upgrades, performance, or security

HOW IT WORKS

We use non-intrusive data collection to perform a detailed audit of your IT systems, comparing the results against guidelines for industry best practices to identify any gaps.

We then deliver an objective, unbiased report of our findings to you so you understand any ways your network performance can be improved. We can also help you determine the best course of action to take depending on what the assessment uncovers.

SO WHAT ARE YOU WAITING FOR?

Schedule your Free Network Assessment today. Give us a call or fill out the web form at www.envoymanagementservices.com/freeassessment and a member of our team will reach out to you shortly.
