

i4300 COMPLETE LMI SYSTEM

LOAD MOMENT INDICATOR

- 4.3" full colour display
- High resolution LCD screen readable in direct sunlight
- CANbus technology
- Option for anti-two-block
- Option for wind speed
- Multi language options

The i4300 is RaycoWylie's cost effective load moment indicator solution ideally suited to the retrofit market.

Featuring a simple, clear display, easy to follow calibration procedures and state of the art diagnostics the i4300 supports multiple sensors including those existing on your machine.

The i4300 is suitable for telescopic cranes requiring only a single reel, with load sensing using measured pressure in the derrick ram for total moment sensing or by measuring in the cranes hoist rope.

"The i4300 is a well engineered and accurate system which is easy to install with long term reliability that I can recommend to anyone looking for a new RCI"

- Graham Carney, Wycliffe Crane & Excavator Safety

OPTIONAL FEATURES TO ADD TO YOUR 4300 SYSTEM

AUTOMATED LUBRICATION MONITORING

- Controls the entire automatic lubrication system
- Displays data directly to the operator
- Ensures continuous lubrication at regular intervals
- Reduces maintenance costs and maximises the life span of critical components

RADAR BLIND SPOT MONITORING

- Prevents collision with people and objects
- Sensors detect both moving and stationary objects
- Audible and visual alarms

TOWER LIGHT

- Warning light visible to surrounding workers
- Yellow: approaching an overload
- Red: overload or overhoist situation

COMPATIBLE WITH THE TELEMATIC SERVICE RAYCOconnect

The event recorder provides a simple overview of the equipment usage.

- Equipment hours
- GPS Location
- Safety critical alarm notifications
- Schedule or event based maintenance notifications
- Remote diagnostics
- Event reports

AVAILABLE ON ALL DEVICES
